St Cecilia’s school kids are...

Pre-Primary are on the move, exploring ways in which humans and objects move.

Year 1 are describing and comparing natural and processed materials.

Year 2 are exploring sensational sounds and how sound travels.

Year 3 are investigating the uses of water and water sources.
Year 4 are investigating plants in action by making observations and creating a fair test.

Year 5 are exploring how light travels and the many sources of light and their uses.

Year 6 are ‘Change Detectives’, investigating physical and chemical substances and their changes.

Year 7 are designing and conducting scientific investigations using the process of fair testing. Here they are looking at the effect of soft drink on teeth.
