

## St Cecilia's Catholic Primary

Monday 28 August 2017

Dear Parents and Guardians

Scitech is visiting the Pilbara! The tour brings Science to the students of Pilbara schools and they will be visiting St Cecilia's on Friday 08 September.

All students from Kindy to Year Six are invited to participate in the shows and workshops. The Science shows are 30-minute presentations that combine a lively mix of explanation, interaction and demonstrations to showcase the scientific process and the relevance of science. Follow-on workshops, also 30-minutes in length, are designed to reinforce the messages in the shows via student-driven, hands-on challenges and experiments.

The Kindy to Year Three students will participate in the *Move It* shows and workshops to learn about motion using the best scientific equipment of all: toys from the toy box! Students will be predicting, testing predictions and experimenting to change the way things move.

The Years Four to Six students will participate in the *Prove It* shows and workshops to test and experiment the rules of physics. Students will experiment with electrical circuits, reflection and force in order to complete an obstacle course.

The cost for students to attend the Scitech show and workshop is \$6.00 each. **Each student needs to return their own permission form and money to their class teacher by Wednesday 06 September.**

Yours sincerely

Amanda Sheen  
Assistant Principal
